To help you focus and grow.

MOBILITY DEVELOPMENT

MOBILITY EXPERTISE

Put maps and augmented reality in your app!

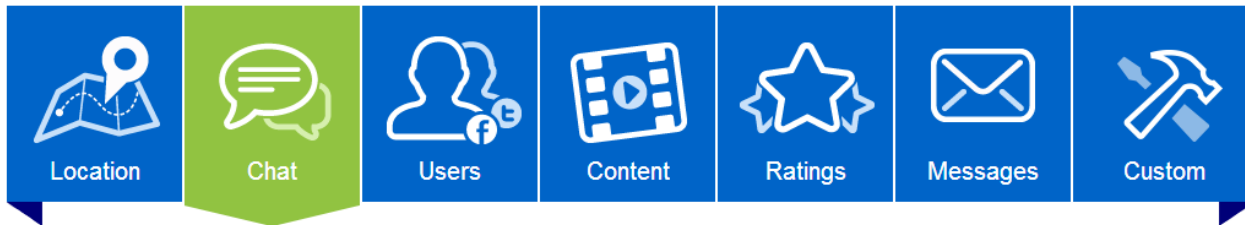

Our location modules connects app users with each other and their environment. Using GPS locations, map integrations and local data, end users can literally 'see' each other on the map and engage with other users, points of interest, and objects..

MOBILITY EXPERTISE

Easy authentication and social network integration.

Our users module helps you manage your user base across all platforms – and retain them. It includes a simple authentication process with Single Sign-On and integration across all popular platforms. This integrates easily with your existing DB.

MOBILITY EXPERTISE

Content storage, management and streaming — all in one.

Send, stream, store, share and save content. Stream movies, securely store business data, allow users to share file attachments to each other. The module is also a CMS — update your app's content without having to republish.
